Cable length	2 m

Teach-In

Programming device

- For ultrasonic sensors UB... whose Teach-In input is on pin 2.
- Easy Teach-In of the switching points A1/A2 or the measuring window.
- Easy selection of the output function:
 - Window mode, NO/NC function.
 - One switching point, NO/NC function.
 - Monitoring of the detection range.

The unit can be switched from the cable connection socket and the plug connection on the sensor for the Teach-In procedure. The switch points/measuring window and output function can be taught in using the A1 and A2 buttons. For detailed information on the procedure see the sensor data sheet.

The taught-in switch points and functions are retained when the programming unit is removed and/or the power is switched off.
