

Power supply

K34-STR-24..30V-3X500VAC-10A

- 8 A output load
- 3 x 380 ... 500 V AC supply voltage
- Sustained short-circuit proof, overload-proof and open-circuit proof
- 23 ... 30 V_{DC} output voltage, can be regulated
- LED operating display
- LED output overload indicator
- SELV
- Suitable for AS-Interface power supply in gateway-integrated data decoupling

Switched mode power supply, 23 ... 30 V DC, 8 A

Function

The slim-line power pack provides a direct voltage in an even larger adjustable output voltage range of 23 ... 30 V DC, while optimizing the space available in the control cabinet.
The current limit can be adjusted via an internal potentiometer. In addition to an LED showing the operational status (power), a red LED (overload) signals overloads on the output side.
The device features a convenient DIN rail fastening.

General specifications

UL File Number E223176

Indicators/operating means

LED Overload Red LED lights up for overload, flashes for hiccup mode

LED PWR LED green

Potentiometer Output voltage settings: 23 ... 30 V_{DC}

Electrical specifications

Capacity factor 0.55 capacitive

Rated operating voltage U_e 3 x 340 ... 550 V_{AC}

Rated operating current I_e 3 x 700 mA At 400 V_{AC}

Supply frequency 47 ... 63 Hz

Mounting

In order to ensure proper heat dissipation the power supply has to be mounted vertically in such a way, that the input terminals (L/N/PE) are located at the upper side and the output terminals (+/-) at the lower side of the front panel.
 A minimum clearance of 100 mm beneath and above and 30 mm to the right and left of the power supply must be provided.
 The inlet air temperature beneath the unit must not exceed the values specified in the technical specification.
 The two plus respectively the two minus output connections are internally tied together.
