

Connector box

CBX800

- Easy scanner connection by means of clamp terminals
- Degree of protection IP65
- Option of upgrading with Profibus, Ethernet and DeviceNet module

Connection module for RS-232 and RS-485 enabled devices

Function

Devices from the CBX* series enable barcode scanners to be connected quickly and easily. A wide variety of connections also allows other field devices to be connected.

By reducing installation time and the number of system failures when a device is replaced, your operating costs will be significantly lower. Standardized pinning of connections and simple attachment of cable ends using spring terminals ensures easy cable installation. To facilitate installation of the device, the continuous mounting holes are easy to access and the top section of housing can be removed.
