

Fiber optic sensor MLV41-LL-IR-IO/95/136

- Robust fiber optic sensor for reliable operation under all conditions
- Adjustable continuous sensitivity
- Easy fiber optic installation with quick-action clamping lock
- Aluminum housing with high-quality Delta Seal coating
- IO-Link interface for service and process data

Robust fiber optic sensor for glass fiber optics, IO-Link interface, infrared light, push-pull output, M8 plug

Function

The unique and extremely popular design of the MLV41 series enables it be mounted correctly in confined areas and offers all the functions that are normally only found on larger phototelectric sensors. The MLV41 series comes with a range of functions. For example, highly visible status LEDs on the front and back, resistance to ambient light, crosstalk protection and universally applicable output stages that permit every possible switching logic and polarity to be realized. The enhanced resistance to ambient light ensures reliable operation even where modern energy-saving lamps with electronic ballasts are in use. The same applies where multiple devices are present, i.e. the use of a number of sensors in the same vicinity causes no problems.

Dimensions

Technical Data

| General specifications | | |
|--------------------------------------|----------------|---|
| Sensor range | | on black (6 %): up to 55 mm on Kodak white, reflection factor 90% up to 160 mm with LLR 04-1.6-0.5-WC3 fiberoptic cable |
| Adjustment range | | 0 ... 160 mm on Kodak white, reflection factor 90% |
| Reference target | | 100 mm x 100 mm on Kodak white, reflection factor 90% |
| Light source | | IREDD |
| Light type | | modulated infrared light , 880 nm |
| Functional safety related parameters | | |
| MTTF _d | | 770 a |
| Mission Time (T _M) | | 20 a |
| Diagnostic Coverage (DC) | | 0 % |
| Indicators/operating means | | |
| Operation indicator | | LED green, statically lit Power on , Undervoltage indicator: Green LED, pulsing (approx. 0.8 Hz) , short-circuit : LED green flashing (approx. 4 Hz) , IO link communication: green LED goes out briefly (1 Hz) |
| Function indicator | | LED yellow, lights up with receiver lit ; flashes when falling short of the operating reserve |
| Control elements | | sensitivity adjustment |
| Electrical specifications | | |
| Operating voltage | U _B | 10 ... 30 V DC |
| Ripple | | max. 10 % |
| No-load supply current | I ₀ | max. 40 mA |
| Interface | | |
| Interface type | | IO-Link |
| Protocol | | IO-Link V1.0 |
| Mode | | COM2 (38.4 kBit/s) |
| Output | | |
| Switching type | | light/dark on |
| Signal output | | 2 push-pull (4 in 1) outputs, complementary, short-circuit proof, reverse polarity protected |
| Switching voltage | | max. 30 V DC |
| Switching current | | max. 100 mA |
| Voltage drop | U _d | ≤ 2.5 V DC |
| Switching frequency | f | 1000 Hz |
| Response time | | 0.5 ms |
| Conformity | | |
| Product standard | | EN 60947-5-2 |
| Approvals and certificates | | |
| UL approval | | cULus Listed 57M3 (Only in association with UL Class 2 power supply; Type 1 enclosure) |
| CCC approval | | CCC approval / marking not required for products rated ≤36 V |
| Ambient conditions | | |
| Ambient temperature | | -20 ... 60 °C (-4 ... 140 °F) |
| Storage temperature | | -40 ... 75 °C (-40 ... 167 °F) |
| Mechanical specifications | | |
| Housing width | | 31 mm |
| Housing height | | 56.5 mm |
| Housing depth | | 13.6 mm |
| Fiber optic adapter | | 04 |
| Degree of protection | | IP67 |
| Connection | | M8 x 1 connector, 4-pin |
| Material | | |
| Housing | | Aluminum , Delta-Seal coated |
| Optical face | | Fiber optic connection |

Technical Data

| | |
|-----------|-------|
| Connector | metal |
| Mass | 50 g |

Connection Assignment

Option:

○ = Light on
● = Dark on

Connection Assignment

Wire colors in accordance with EN 60947-5-2

| | | |
|---|----|---------|
| 1 | BN | (brown) |
| 2 | WH | (white) |
| 3 | BU | (blue) |
| 4 | BK | (black) |

Assembly

| | |
|---------------------------|--|
| 1 Operating display green | 3 Sensing range adjuster / adjustment mode |
| 2 Function display yellow | |

|  | ICE3-8IOL-K45P-RJ45 | PROFINET IO IO-Link master with 8 inputs/outputs, DIN rail, push-in terminals |
|  | ICE3-8IOL-K45S-RJ45 | PROFINET IO IO-Link master with 8 inputs/outputs, DIN rail, screw terminal |
|  | IO-Link-Master02-USB | IO-Link master, supply via USB port or separate power supply, LED indicators, M12 plug for sensor connection |

IO link function

The IO link operating mode is indicated by the green LED indicator with a short interruption ($f = 1 \text{ Hz}$). IO link communication simultaneously provides process data (measurement data from the sensor) and access to requirement data.

The requirement data contains the following information:

Identification:

- Manufacturer information
- Product ID
- User-specific ID

Device parameters:

- Teach-in parameters
- Operating parameters
- Configuration parameters
- Device commands

Diagnostic messages and warnings

Setting information

Detection range adjustment:

The detection range can be set via the rotary switch or the IO-Link.

Setting using the rotary switch:

If you would like to change the detection range on the sensor, turn:

- the rotary switch to the left to reduce the value.
- the rotary switch to the right to increase the value.

With the IO-Link, the set detection range the current rotary switch configuration is always assigned.

If the rotary switch is too far to the left or the right, perform the following:

Turn the potentiometer completely to the left until it stops. The LED will briefly flash green.

The assignment of the current rotary switch configuration to the detection range set via IO-Link is overridden.

Now set the desired detection range again.

Example application - manually reduce detection range:

The potentiometer has one position as shown here. The adjustable detection range is set via IO-Link to maximum. The rotary switch is too far to the left to set a considerably lower detection range for example.

Turn the potentiometer to the left until it stops to override the set value to this rotary switch configuration. The LED will briefly flash green.

Now set the desired detection range again.
