

Barcode scanner

VB14N-600-T-R

- Grid scanner
- Version for low temperature applications
- Simple operation via function keys: test mode, code teaching and code optimization
- Code reconstructor
- Connect up to 32 scanners
- Sturdy aluminum housing
- Two serial interfaces RS 232 / RS 485
- Engine control (On/Off) possible
- Degree of protection IP65

Barcode scanner

Function

The VB14N-***-T-R is a grid scanner for reading 1D barcodes and is specially designed for use at low temperatures. With its high-performance optics and code reconstruction, the barcode scanner offers a high level of reliability when reading 1D barcodes that are difficult to detect. A function key and several LEDs on the barcode scanner provide support when parameterizing, teaching in barcodes, and testing. In live operation, the LEDs provide information about the relevant read status. You can establish a high-speed connection between up to 32 devices. This connection enables data to be recorded in a quicker and more efficient manner, without the need for an additional external multiplexer. The corresponding PC software makes parameterization simple.

Technical Data

| General specifications | |
|----------------------------|---|
| Light source | laser diode |
| Light type | modulated visible red light |
| Laser nominal ratings | |
| Note | LASER LIGHT , DO NOT STARE INTO BEAM |
| Laser class | 2 |
| Wave length | 650 nm |
| Beam divergence | < 1.5 mrad |
| Pulse length | 1.5 ms |
| Repetition rate | 200 Hz |
| max. pulse energy | 3.26 μ J |
| Scan rate | 600 ... 1000 s ⁻¹ |
| Read distance | 190 ... 600 mm |
| Grid | 35 mm at 600 mm |
| Opening angle | 50 ° |
| Optical face | front or on side (with deviation mirror) |
| Resolution | 0.35 mm (14 mils) |
| Indicators/operating means | |
| Operation indicator | LED blue: Power on, LED green: Ready to read (READY), LED green: Read successfully (GOOD), LED yellow: External trigger signal pending (TRIGGER), LED yellow: Communication active (COM), LED red: "no read" (STATUS) |
| Electrical specifications | |
| Operating voltage | U _B 10 ... 30 V DC |

Safety Information

Laser Class 2 Information

The irradiation can lead to irritation especially in a dark environment. Do not point at people!

Caution: Do not look into the beam!

Maintenance and repairs should only be carried out by authorized service personnel!

Attach the device so that the warning is clearly visible and readable.

Caution – Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
