

## Triangulation sensor (BGS)

### OBT150-R101-2EP1-IO

- Miniature design with versatile mounting options
- Best background suppressor in its class
- Precision object detection, almost irrespective of the color
- Extended temperature range  
-40 °C ... 60 °C
- High degree of protection IP69K
- IO-Link interface for service and process data

Triangulation sensor with background suppression

**IO-Link**

### Function

The miniature optical sensors are the first devices of their kind to offer an end-to-end solution in a small single standard design — from thru-beam sensor through to a distance measurement device. As a result of this design, the sensors are able to perform practically all standard automation tasks.

The DuraBeam laser sensors are durable and can be used in the same way as a standard sensor.

The use of Multi Pixel Technology gives the standard sensors a high level of flexibility and enables them to adapt more effectively to their operating environment.

### Dimensions

## Technical Data

| General specifications               |                |   |
|--------------------------------------|----------------|---|
| Detection range                      |                | 5 ... 150 mm  |
| Detection range min.                 |                | 5 ... 25 mm   |
| Detection range max.                 |                | 5 ... 150 mm  |
| Adjustment range                     |                | 25 ... 150 mm   |
| Reference target                     |                | standard white, 100 mm x 100 mm   |
| Light source                         |                | LED   |
| Light type                           |                | modulated visible red light   |
| LED risk group labelling             |                | exempt group  |
| Black-white difference (6%/90%)      |                | < 5 % at 150 mm   |
| Diameter of the light spot           |                | approx. 10 mm at a distance of 150 mm   |
| Opening angle                        |                | approx. 3 °   |
| Ambient light limit                  |                | EN 60947-5-2 : 40000 Lux  |
| Functional safety related parameters |                |   |
| MTTF <sub>d</sub>                    |                | 600 a   |
| Mission Time (T <sub>M</sub> )       |                | 20 a  |
| Diagnostic Coverage (DC)             |                | 0 %   |
| Indicators/operating means           |                |   |
| Operation indicator                  |                | LED green:<br>constantly on - power on<br>flashing (4Hz) - short circuit<br>flashing with short break (1 Hz) - IO-Link mode   |
| Function indicator                   |                | LED yellow:<br>constantly on - object detected<br>constantly off - object not detected  |
| Control elements                     |                | Light-on/dark-on changeover switch  |
| Control elements                     |                | Sensing range adjuster  |
| Electrical specifications            |                |   |
| Operating voltage                    | U <sub>B</sub> | 10 ... 30 V DC  |
| Ripple                               |                | max. 10 %   |
| No-load supply current               | I <sub>0</sub> | < 25 mA at 24 V supply voltage  |
| Protection class                     |                | III   |
| Interface                            |                |   |
| Interface type                       |                | IO-Link ( via C/Q = BK )  |
| IO-Link revision                     |                | 1.1   |
| Device profile                       |                | Smart Sensor  |
| Device ID                            |                | 0x11060F (1115663)  |
| Transfer rate                        |                | COM2 (38.4 kBit/s)  |
| Min. cycle time                      |                | 2.3 ms  |
| Process data width                   |                | Process data input 1 Bit<br>Process data output 2 Bit   |
| SIO mode support                     |                | yes   |
| Compatible master port type          |                | A   |
| Output                               |                |   |
| Switching type                       |                | The switching type of the sensor is adjustable. The default setting is:<br>C/Q - Pin4: NPN normally closed / dark-on, PNP normally open / light-on, IO-Link<br>/Q - Pin2: NPN normally open / light-on, PNP normally closed / dark-on |
| Signal output                        |                | 2 push-pull (4 in 1) outputs, short-circuit protected, reverse polarity protected,<br>overvoltage protected   |
| Switching voltage                    |                | max. 30 V DC  |
| Switching current                    |                | max. 100 mA , resistive load  |
| Usage category                       |                | DC-12 and DC-13   |
| Voltage drop                         | U <sub>d</sub> | ≤ 1.5 V DC  |
| Switching frequency                  | f              | 500 Hz  |
| Response time                        |                | 1 ms  |
| Conformity                           |                |   |

## Technical Data

|                                   |  |
|-----------------------------------|--|
| Communication interface           | IEC 61131-9  |

## Configuration

- 1 - Light on / dark on changeover switch
- 2 - Sensing range / sensitivity adjuster
- 3 - Operating indicator / dark on
- 4 - Signal indicator
- 5 - Operating indicator / light on

To unlock the adjustment functions turn the sensing range adjuster for more than 180 degrees.

### Sensing Range / Sensitivity

Turn sensing range / sensitivity adjuster clockwise to increase sensing range / sensitivity.

Turn sensing range /sensitivity adjuster counterclockwise to decrease sensing range / sensitivity.

If the end of the adjustment range is reached, the signal indicator starts flashing with 8 Hz.

### Light on / Dark on Configuration

Press the light on / dark on changeover switch for more than 1 second (less than 4 seconds). The light on / dark on mode changes and the operating indicators are activated accordingly.

If you press the light on / dark on changeover switch for more than 4 seconds, the light on / dark on mode changes back to the original setting. On release of the light on / dark on changeover switch the current state is activated.

### Restore Factory Settings

Press the light on / dark on changeover switch for more than 10 seconds (less than 30 seconds) until all LEDs turn off. On release of the light on / dark on changeover switch the signal indicator turns on. After 5 seconds the sensor resumes operation with factory settings.

After 5 minutes of inactivity the sensing range / sensitivity adjustment is locked. In order to reactivate the sensing range / sensitivity adjustment, turn the sensing range / sensitivity adjuster for more than 180 degrees.
