

Active infrared scanner AIR30-8-H-2500/32/76a

- Single-beam light scanner
- Can be used to monitor both main and ancillary closing edges
- Closing edge safety on revolving doors and carousel doors
- Accurate beam alignment thanks to finely bundled light beam
- Background suppression operating mode: ignores objects outside the sensing range

Single-beam active infrared scanner, background suppression, max. installation height 2.5 m, black housing, 1 PNP output, test input, fixed cable

Function

AIR30 is a series of active infrared scanners with excellent optical properties for monitoring closing edges in a wide range of door systems. The diverse range of housings and mounting options allow the devices to be adapted to suit a whole host of mounting conditions.

Application

- Monitoring closing edges and crushing points on revolving doors and carousel doors
- Door monitoring system in local public transportation

Technical Data

General specifications

| | |
|-----------------------------------|-----------------------------------|
| Detection range min. | 550 ... 1000 mm |
| Detection range max. | 550 ... 2500 mm |
| Light source | IREL |
| Light type | modulated infrared light |
| Black-white difference (6 %/90 %) | ≤ 400 mm at a distance of 2000 mm |
| Transmitter frequency | 1800 Hz |
| Operating mode | Background suppression |
| Diameter of the light spot | 50 mm at 2000 mm sensor range |
| Opening angle | approx. 1.4 ° |
| Accessories provided | Swivel bracket, Mounting bracket |

Functional safety related parameters

| | |
|--------------------------------|--------|
| MTTF _d | 1050 a |

Function Principle

Active infrared scanners detect people and objects using short-wave infrared radiation according to the triangulation principle. A switch signal is tripped if the infrared beam emitted is reflected by an object within the specified sensing range. Where background suppression is activated, the background (e.g. ground) is detected but not evaluated. This allows an extremely precise detection area to be set and ensures reliable detection of people, vehicles and other objects.
