

Switch Amplifier

HiC2853R6

- 1-channel isolated barrier
- 24 V DC supply (bus powered)
- Input for approved dry contacts or SN/S1N sensors
- Usable as signal splitter (1 input and 2 outputs)
- Application-specific outputs
- Active voltage output
- Passive transistor output (resistive)
- Line fault detection (LFD)
- Line fault transparency (LFT)
- Up to SIL 3 acc. to IEC/EN 61508

Function

This isolated barrier is used for intrinsic safety applications. The device transfers digital signals (SN/S1N proximity sensors or approved dry contacts) from the explosion-hazardous area to the non-explosion-hazardous area. The input controls one active voltage output and one passive transistor output with a resistive output characteristic. The passive transistor output has three defined states: 1-signal $\approx 64\% \times U_r$, 0-signal $\approx 28\% \times U_r$, and fault $< 200\text{ mV}$. This output characteristic offers line fault transparency on the signal lines. During a fault state, both outputs switch to their fault state and LEDs indicate the fault according to NAMUR NE 44. A separate fault bus is available. This fault bus can be monitored if the termination board supports a module fault detection. Unlike a SN/S1N series safety sensor, an approved dry contact requires a $10\text{ k}\Omega$ resistor to be placed across the contact in addition to a $1.5\text{ k}\Omega$ resistor in series. This device mounts on a HiC termination board.

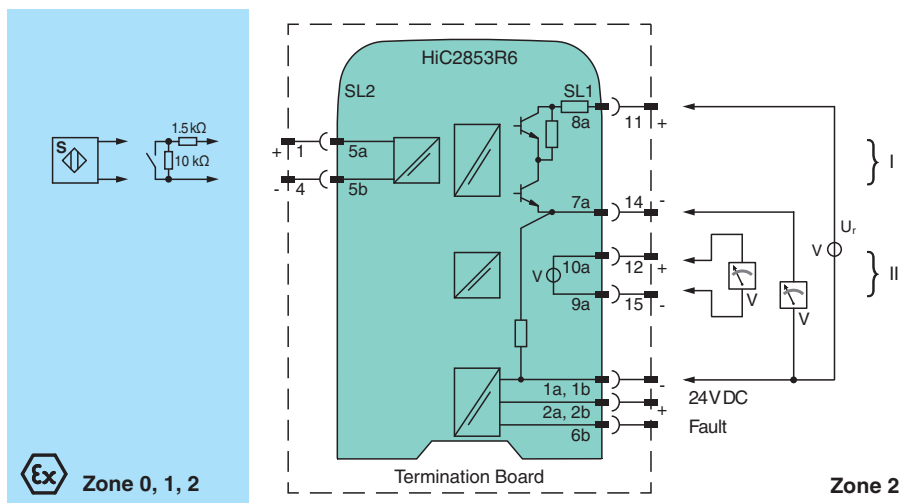

Application

This device is compatible to the control:

- Schneider Electric Tricon-CX 3506X

Compatibility check to other ESD/ DCS systems on request.

Safety Information

The pins for this device are trimmed to polarize it according to its safety parameter. Do not change this setting!
For further information see system manual.

Safety Information

We recommend that you do not connect the device supply to a DC supply network.
If you connect the device supply to a DC supply network, make sure that appropriate protective measures are implemented to ensure that no transient overvoltages occur.

Configuration
