

Photoelectric slot sensor GL3-U/153

- Miniature design
- Optimized for the detection of small parts
- High switching frequency

Miniature photoelectric slot sensor for the detection of small parts, U-shaped housing design, 3.15 mm slot width, infrared light, NPN outputs, fixed cable

Function

The GL2 & GL3 miniature slot sensor is the smallest slot sensor in its family optimized to the requirements in semiconductors industry for small part detection. A wide voltage range of 5 V DC ... 30 V DC and a extreme fast response time of 25 μ s stands for the quality of this sensor. The GL2 & GL3 sensor can be directly connected to a comparator or Schmitt-trigger circuit. Due to a variety of different housings and an optimized housing concept offers the sensor a maximum of freedom in a crowded mounting environment.
