

Incremental Encoder for special applications

RSI58N-*****1

- Industrial standard housing $\varnothing 58$ mm
- Up to 50,000 ppr
- Recessed hollow shaft
- 10 V ... 30 V with short-circuit proof push-pull output

Function

High performance are key words for this rotary encoder. Its outstanding feature is the-high resolution angle. All six output channels are fitted for this incremental rotary encoder. It can thus be used universally in many different applications. This incremental rotary encoder is available in recessed hollow shaft design with a shaft 10 mm in diameter x 20 mm or with a shaft 12 mm in diameter x 20 mm. The rotary encoder is held in place by an included torque rest. The electrical connection is made by a 8-pin or a 12-pin round plug connector. It is also possible to obtain a version with a cable connector.
