Function

DIS* switch disconnectors and SAF* safety switches guarantee safe disconnection of machines from the mains power supply during cleaning, maintenance and repair. They can be utilized in hazardous areas up to zone 1 / 21. Various main and auxiliary contact configurations cover many switching requirements.

Enclosure variants are available in high-quality stainless steel and rugged GRP material.

According to IEC 62626-1 the enclosure cover of SAF* variants can only be opened when the switch is in ON position.
