

Thin Client Firmware

VisuNet RM Shell 5 2019 LTSC Upgrade-Package

- Upgrade HMI devices from RM Shell 4 or 5 (based on Windows® 10 IoT 2016 LTSC) to RM Shell 5 (based on Windows® 10 IoT 2019 LTSC)
- Easy download of new images
- Contains COA label that licenses the thin client for the new operating system

VisuNet RM Shell 5 2019 LTSC Upgrade-Package for VisuNet Remote Monitors and Box Thin Clients

Function

This upgrade tool only works with VisuNet Remote Monitors and Box Thin Clients from Pepperl+Fuchs that were originally delivered with the RM Shell 5 firmware based on Windows® 10 IoT Enterprise LTSC 2016 operating system or installed RM Shell 4 firmware. Note that when using the tool to upgrade a system, all previously saved data, configurations and license keys will be overwritten.

Technical Data

Software	
Operating system	Before upgrade: Based on Microsoft® Windows 10 IoT Enterprise 2016 LTSC or VisuNet RM Shell 4
Languages	English
Licensing	A new Windows licence is included in the VisuNet RM Shell 5 2019 LTSC Upgrade-Package that needs to be purchased. PRO license key, Emerson DRDC license key, VisuNet CC license key are still valid
Installation	The VisuNet RM Shell 5 2019 LTSC Upgrade-Package requires the latest factory reset update (>6.0) on the relevant devices.
Associated products	VisuNet Remote Monitors with pre-installed RM Shell 5 and VisuNet RM Shell 4

Compatible Devices (with preinstalled RM Shell 5)
